Governor Gray Davis
State Capitol
Sacramento, CA 95814

Governor Davis:

Please support a CALFED Bay/Delta Program that will protect and use wisely California's water resources.

I have lived in California for 35 years, and I've seen the decline in our state's natural waters. Flooding, loss of wildlife, and increased pollution are the results of our mismanagement. We need to take strong action to ensure that these resources will not be depleted further.

A good CALFED program needs to invest in water efficiency for at least 7 years before considering new dams or reservoirs. Conservation is a must.

Restore the rivers, bays and fisheries by providing adequate fresh water and caring for the land around the waters.

Enforce pollution limits!

No new dams! Rivers must be allowed to flow freely in order to keep them healthy.

Thank you.

Sincerely,

Mary A. Gravitt
